

Project Demo Planning

Date	30 June 2026
Team ID	XXXXXX
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the OptiCrop project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Overview of the OptiCrop project — problem statement, objectives, and real-world impact for farmers and researchers.	3	CH.V.Rithesh Reddy
2	Solution Architecture	Walk through the system architecture: ML model pipeline, Flask REST API, Streamlit dashboard, and data flow.	3	D.Dhanush
3	Crop Recommendation Demo	Live demo — enter N, P, K, temperature, humidity, pH, rainfall values and show AI-generated top crop recommendation.	4	CH.V.Rithesh Reddy
4	Suitability Checker Demo	Select a specific crop and evaluate whether current soil-climate conditions are suitable. Show compatibility report.	3	D.Dhanush
5	Fertilizer Optimization & Analytics	Demonstrate fertilizer quantity recommendation and researcher analytics dashboard with charts and trend insights.	3	Tejandra Vasantha
6	Q&A; and Conclusion	Open Q&A; session. Summarize key achievements, sprint velocity, model accuracy (97.9%), and future roadmap.	4	All Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	CH.V.Rithesh Reddy introduces OptiCrop and explains the farmer pain points and gaps in current crop advisory.
2	Solution Overview	D.Dhanush walks through the ML architecture, tech stack (Python, Flask, scikit-learn, Streamlit), and system design.

3	Live Feature Demonstration	All 3 features demonstrated live: Crop Recommendation → Suitability Checker → Fertilizer Optimizer → Analytics. Tejandra Vasantha handles analytics section.
4	Q&A; Session	All team members answer evaluator questions. Rithesh handles ML model questions; Dhanush handles API; Tejandra handles UI/UX.
