

Team Involvement in Demonstration

Date	05 July 2026
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document records the active participation and roles of each team member during the OptiCrop project demonstration. Every member contributed meaningfully to the presentation and responsibilities were distributed fairly and clearly.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation (Active/Passive)
1	CH.V.Rithesh Reddy	Team Leader & Presenter	Project Overview & Live Demo	Led the demo walkthrough, demonstrated live crop prediction using the Crop Feasibility Analyzer with real soil inputs	Active
2	Dama Venkata Dhanush Chowdary	ML Engineer Presenter	ML Pipeline & Model Accuracy	Explained the Multi-Algorithm ML pipeline (LR, KNN, DT, RF, K-Means), model training process, and accuracy metrics	Active
3	Dama Venkata Dhanush	Backend Developer Presenter	Flask Backend & API Endpoints	Presented the Flask application architecture, /predict endpoint, input validation logic, and Render deployment setup	Active
4	Tejendra Vasantha	Frontend Developer Presenter	UI/UX Demo & Responsive Design	Demonstrated the OptiCrop web interface — home page, Crop Feasibility Analyzer form, and mobile-responsive layout	Active
5	CH.V.Rithesh Reddy	Data & Testing Presenter	Dataset, EDA & Test Results	Presented the Crop_recommendation.csv dataset, EDA visualizations, and unit test results from test_model.py	Active
6	CH.V.Rithesh Reddy	Q&A; & Documentation	Solution Requirements & Future Scope	Handled evaluator Q&A;,, summarized key project documents, and presented the scalability and future roadmap	Active

Team Coordination Notes:

Aspect	Details
Team Leader / Coordinator	CH.V.Rithesh Reddy – Coordinated task distribution, managed the demo timeline, and ensured all sections were clearly presented within the allotted time.
Overall Team Coordination Rating (1-5)	5 – All six members were well-prepared, transitions between sections were smooth, and the live demo ran without errors.
Any issues during demo	Minor network latency observed during the live crop prediction demo on the Render-hosted URL due to the free-tier cold start.
How issues were resolved	The team pre-loaded the OptiCrop URL before the demo to trigger server warm-up; all subsequent live predictions ran within 1–2 seconds with no further delays.
