

Brainstorming & Idea Prioritization Template

Date	30 June 2026
Team ID	XXXXXX
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	CH.V.RITESH REDDY	Smart crop recommendation system using N, P, K, temperature, humidity, pH and rainfall data to suggest the best crop for a farmer's field.	Core Feature	1
2	D.DHANUSH	Dashboard for agricultural researchers/policymakers to analyze crop-environment relationships and identify regional production patterns, plus a fertilizer optimization module.	Analytics	2
3	TEJANDRA VASANTHA	Mobile-friendly farmer interface with regional language support, historical yield tracking, and sustainability scoring.	User Experience	3

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority Selected (Yes/No)
1	Smart Crop Recommendation Engine (using N, P, K, temperature, humidity, pH, rainfall to suggest the best crop and assess crop-soil-climate suitability).	High	High	Yes
2	Analytics & Resource Optimization Module (crop-environment pattern analysis for researchers/policymakers plus fertilizer optimization recommendations).	Medium	High	Yes

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority Selected (Yes/No)
3	Farmer-Facing Mobile Interface with Yield Tracking (multilingual UI, historical yield tracking, and sustainability scoring).	Medium	Medium	No
